Network Camera

Installation Manual

Before operating the unit, please read this manual thoroughly and retain it for future reference.

SNC-DH140/DH240 SNC-DH140T/DH240T

IP E LA Exmor™ HD

http://www.sony.net/

© 2012 Sony Corporation Printed in U.S.A.

Owner's Record

The model and serial numbers are located on the bottom. Record these numbers in the spaces provided below. Refer to these numbers whenever you call upon your Sony dealer regarding this product.

Model No. _____ Serial No. _____

WARNING

To reduce a risk of fire or electric shock, do not expose this product to rain or moisture.

To avoid electrical shock, do not open the cabinet. Refer servicing to qualified personnel only.

WARNING

This installation should be made by a qualified service person and should conform to all local codes.

WARNING

A readily accessible disconnect device shall be incorporated in the building installation wiring.

WARNING (for Installers only)

Instructions for installing the equipment on the ceiling or the wall:
After the installation, ensure the connection is capable of supporting at least a force of 50 Newtons (N) downwards.

CAUTION

The rating label is located on the bottom.

CAUTION for LAN port

For safety reason, do not connect the LAN port to any network devices that might have excessive voltage.

The LAN port of this unit is to be connected only to the devices whose power feeding meets the requirements for SELV (Safety Extra Low Voltage) and complies with Limited Power Source according to IEC 60950-1.

Use IEEE802.3af standard compliant devices.

Power Supply

Caution for U.S.A. and Canada

The SNC-DH140/DH240/DH140T/DH240T operates on 24 V AC or 12 V DC. The SNC-DH140/DH240/DH140T/DH240T automatically detects the power.

In the USA, this product shall be powered by a UL listed Class 2 Power Supply Only.

In Canada, this product shall be powered by a CSA Certified Class 2 Power Supply Only.

Caution for other countries

The SNC-DH140/DH240/DH140T/DH240T operates on 24 V AC or 12 V DC. The SNC-DH140/DH240/DH140T/DH240T automatically detects the power. Use a power supply rated 24 V AC or 12 V DC which meets the requirements for SELV (Safety Extra Low Voltage) and complies with Limited Power Source according to IEC 60950-1.

For customers in the U.S.A.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

You are cautioned that any changes or modifications not expressly approved in this manual could void your authority to operate this equipment.

All interface cables used to connect peripherals must be shielded in order to comply with the limits for a digital device pursuant to Subpart B of Part 15 of FCC Rules.

For customers in Canada

This Class A digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe A est conforme à la norme NMB-003 du Canada.

For the customers in Europe

The manufacturer of this product is Sony Corporation, 1-7-1 Konan, Minato-ku, Tokyo, Japan.

The Authorized Representative for EMC and product safety is Sony Deutschland GmbH, Hedelfinger Strasse 61, 70327 Stuttgart, Germany.

For any service or guarantee matters please refer to the addresses given in separate service or guarantee documents.

For the customers in Europe, Australia and New Zealand

WARNING
This is a Class A product. In a domestic environment, this product may cause radio interference in which case the user may be required to take adequate measures.

In the case that interference should occur, consult your nearest authorized Sony service facility.

This apparatus shall not be used in the residential area.

ATTENTION

The electromagnetic fields at specific frequencies may influence the picture of the unit.

Notes on Use

Before Use

- If you find condensation when you open the package, turn on the power after the condensation disappears.
- Remove the static electricity before operation or when touching the inside parts of the camera.
- Data and security**
 - You should keep in mind that the images or audio you are monitoring may be protected by privacy and other legal rights, and the responsibility for making sure you are complying with applicable laws is yours alone.
 - Access to the images and audio is protected only by a user name and the password you set up. No further authentication is provided nor should you presume that any other protective filtering is done by the service. Since the service is Internet-based, there is a risk that the image or audio you are monitoring can be viewed or used by a third-party via the network.
 - SONY IS NOT RESPONSIBLE, AND ASSUMES ABSOLUTELY NO LIABILITY TO YOU OR ANYONE ELSE, FOR SERVICE INTERRUPTIONS OR DISCONTINUITIES OR EVEN SERVICE CANCELLATION. THE SERVICE IS PROVIDED AS-IS, AND SONY DISCLAIMS AND EXCLUDES ALL WARRANTIES, EXPRESS OR IMPLIED, WITH RESPECT TO THE SERVICE INCLUDING, BUT NOT LIMITED TO, ANY OR ALL IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR THAT IT WILL OPERATE ERROR-FREE OR CONTINUOUSLY.**
 - Always make a test recording, and verify that it was recorded successfully. SONY WILL NOT BE LIABLE FOR DAMAGES OF ANY KIND INCLUDING, BUT NOT LIMITED TO, COMPENSATION OR REIMBURSEMENT ON ACCOUNT OF FAILURE OF THIS UNIT OR ITS RECORDING MEDIA, EXTERNAL STORAGE SYSTEMS OR ANY OTHER MEDIA OR STORAGE SYSTEMS TO RECORD CONTENT OF ANY TYPE.
 - Always verify that the unit is operating properly before use. SONY WILL NOT BE LIABLE FOR DAMAGES OF ANY KIND INCLUDING, BUT NOT LIMITED TO, COMPENSATION OR REIMBURSEMENT ON ACCOUNT OF THE LOSS OF PRESENT OR PROSPECTIVE PROFITS DUE TO FAILURE OF THIS UNIT, EITHER DURING THE WARRANTY PERIOD OR AFTER EXPIRATION OF THE WARRANTY, OR FOR ANY OTHER REASON WHATSOEVER.
 - If you lose data by using this unit, SONY accepts no responsibility for restoration of the data.

Personal information

- The images taken by the system using this device can identify individuals and thus they fall under "personal information" stipulated in the "Act on the Protection of Personal Information". Please handle the video data appropriately according to law.
- Information recorded using this product may also be "personal information". Upon disposal, transfer, repair, or any other occasion where this product or storage media is passed on to a third party, practice due care in its handling.

Operating or storage location

Do not shoot an extremely bright object (an illumination, the sun, etc.). Also, avoid operating or storing the camera in the following locations, as these can be a cause of a malfunction.

- Extremely hot or cold places (Operating temperature: -10°C to +50°C [14°F to 122°F])
- Exposed to direct sunlight for a long time, or close to heating equipment (e.g., near heaters)
- Close to sources of strong magnetism
- Close to sources of powerful electromagnetic radiation, such as radios or TV transmitters
- Locations subject to strong vibration or shock
- Humid or dusty locations
- Locations exposed to rain
- Locations under the influence of fluorescent light or reflection of a window
- Under an unsteady light (the image will flicker.)

Ventilation

To prevent heat buildup, do not block air circulation around the camera.

Transportation

Always turn off the power when carrying. When transporting the camera, repack it as originally packed at the factory or in materials of equal quality.

Cleaning

- Use a blower to remove dust from the lens.
- Use a soft, dry cloth to clean the external surfaces of the camera. Stubborn stains can be removed using a soft cloth dampened with a small quantity of detergent solution, then wipe dry.
- Do not use volatile solvents such as alcohol, benzene or thinners as they may damage the surface finishes.

Note on laser beams

Laser beams may damage image sensors. You are cautioned that the surface of image sensors should not be exposed to laser beam radiation in an environment where a laser beam device is used.

Phenomena Specific to Image Sensors

The following phenomena that may occur in images are specific to image sensors. They do not indicate a malfunction.

White flecks

Although the image sensors are produced with high-precision technologies, fine white flecks may be generated on the screen in rare cases, caused by cosmic rays, etc.

This is related to the principle of image sensors and is not a malfunction.

The white flecks especially tend to be seen in the following cases:

- when operating at a high environmental temperature
- when you have raised the gain (sensitivity)
- when using the slow shutter

Aliasing

When fine patterns, stripes, or lines are shot, they may appear jagged or flicker.

About the imaging conditions

- When Auto Iris is set to On, resolution may be unsatisfactory. In this case, set Auto Iris to Off.
- When View-DR is set to On, resolution may be unsatisfactory. In this case, set View-DR to Off, Auto Iris to Off and shutter speed to Auto (SNC-DH240/DH240T).

About the Supplied Manuals

Installation Manual (this document)

This Installation Manual describes the names and functions of parts and controls of the Network Camera, gives connection examples and explains how to set up the camera. Be sure to read the Installation Manual before operating. The pictures of SNC-DH240 are mainly used in explanatory examples.

User's Guide (stored in the CD-ROM)

The User's Guide describes how to set up the camera and how to control the camera via a Web browser. After installing and connecting the camera correctly, operate referring to this User's Guide.

Using the CD-ROM Manuals

The supplied CD-ROM disc includes the User's Guides for this unit in PDF format.

Preparations

The Adobe Reader Version 6.0 or higher must be installed on your computer in order to use the guides stored in the CD-ROM disc.

Note

If Adobe Reader is not installed, it may be downloaded from the following URL: <http://www.adobe.com/>

Reading the manual in the CD-ROM

1 Insert the CD-ROM in your CD-ROM drive.

A cover page appears automatically in your Web browser. If it does not appear automatically in the Web browser, double-click on the index.htm file on the CD-ROM.

2 Select and click on the manual that you want to read.

This opens the PDF file of the manual. Clicking an item in the Table of Contents allows you jump to the relevant page.

Notes

- The files may not be displayed properly, depending on the version of Adobe Reader. In this case, install the latest version, which you can download from the URL mentioned in "Preparations" above.
- If you have lost or damaged the CD-ROM, you can purchase replacement. Contact your Sony service representative.

Adobe and Acrobat Reader are trademarks of Adobe Systems Incorporated in the United States and/or other countries.

Smartphone viewer

This product is equipped with a Smartphone viewer.

With Smartphone viewer, you can display an image from a network camera, pan, tilt and zoom that camera, on your smartphone. For more details, see "Smartphone viewer User's Manual" at the following URL: <http://www.sony.net/ipela/snc/>

Location and Function of Part

The figure shows the camera without the dome casing.

Side

Cables ①, ② and ⑦ are not connected when the unit comes from the factory.

① Audio cable (supplied)

The connector with the longer cable (SP) is used for the line output connector, and the shorter cable (MIC) is used for the microphone/line input connector.

② SP terminal (minijack, monaural)

Connect a commercially available speaker system with a built-in amplifier.

③ MIC terminal (minijack, monaural)

Connect a commercially available microphone. This jack supports plug-in-power microphones (rated voltage: 2.5 V DC).

④ I/O (Input/Output) cable (supplied)

This cable is provided with a sensor input and two alarm outputs.

The wires of the cable control the following signals.

Color of wire	Name
Red	Sensor In +
White	Sensor In - (GND)
Black	Alarm Out 1 +
Yellow	Alarm Out 1 -
Brown	Alarm Out 2 +
Green	Alarm Out 2 -

For details on each function and required settings, see the User's Guide stored in the supplied CD-ROM.

For the wiring, see "Connecting the I/O cable".

⑤ Camera head holder

⑥ Lens

⑦ LAN cable (RJ-45) (supplied and connected to the camera at the factory)

Connect this cable to a hub or computer on the 10BASE-T or 100BASE-TX network using a network cable (UTP, category 5).

⑧ Power input cable (supplied and connected to the camera at the factory)

Connect this cable to a 24 V AC or 12 V DC power supply system.

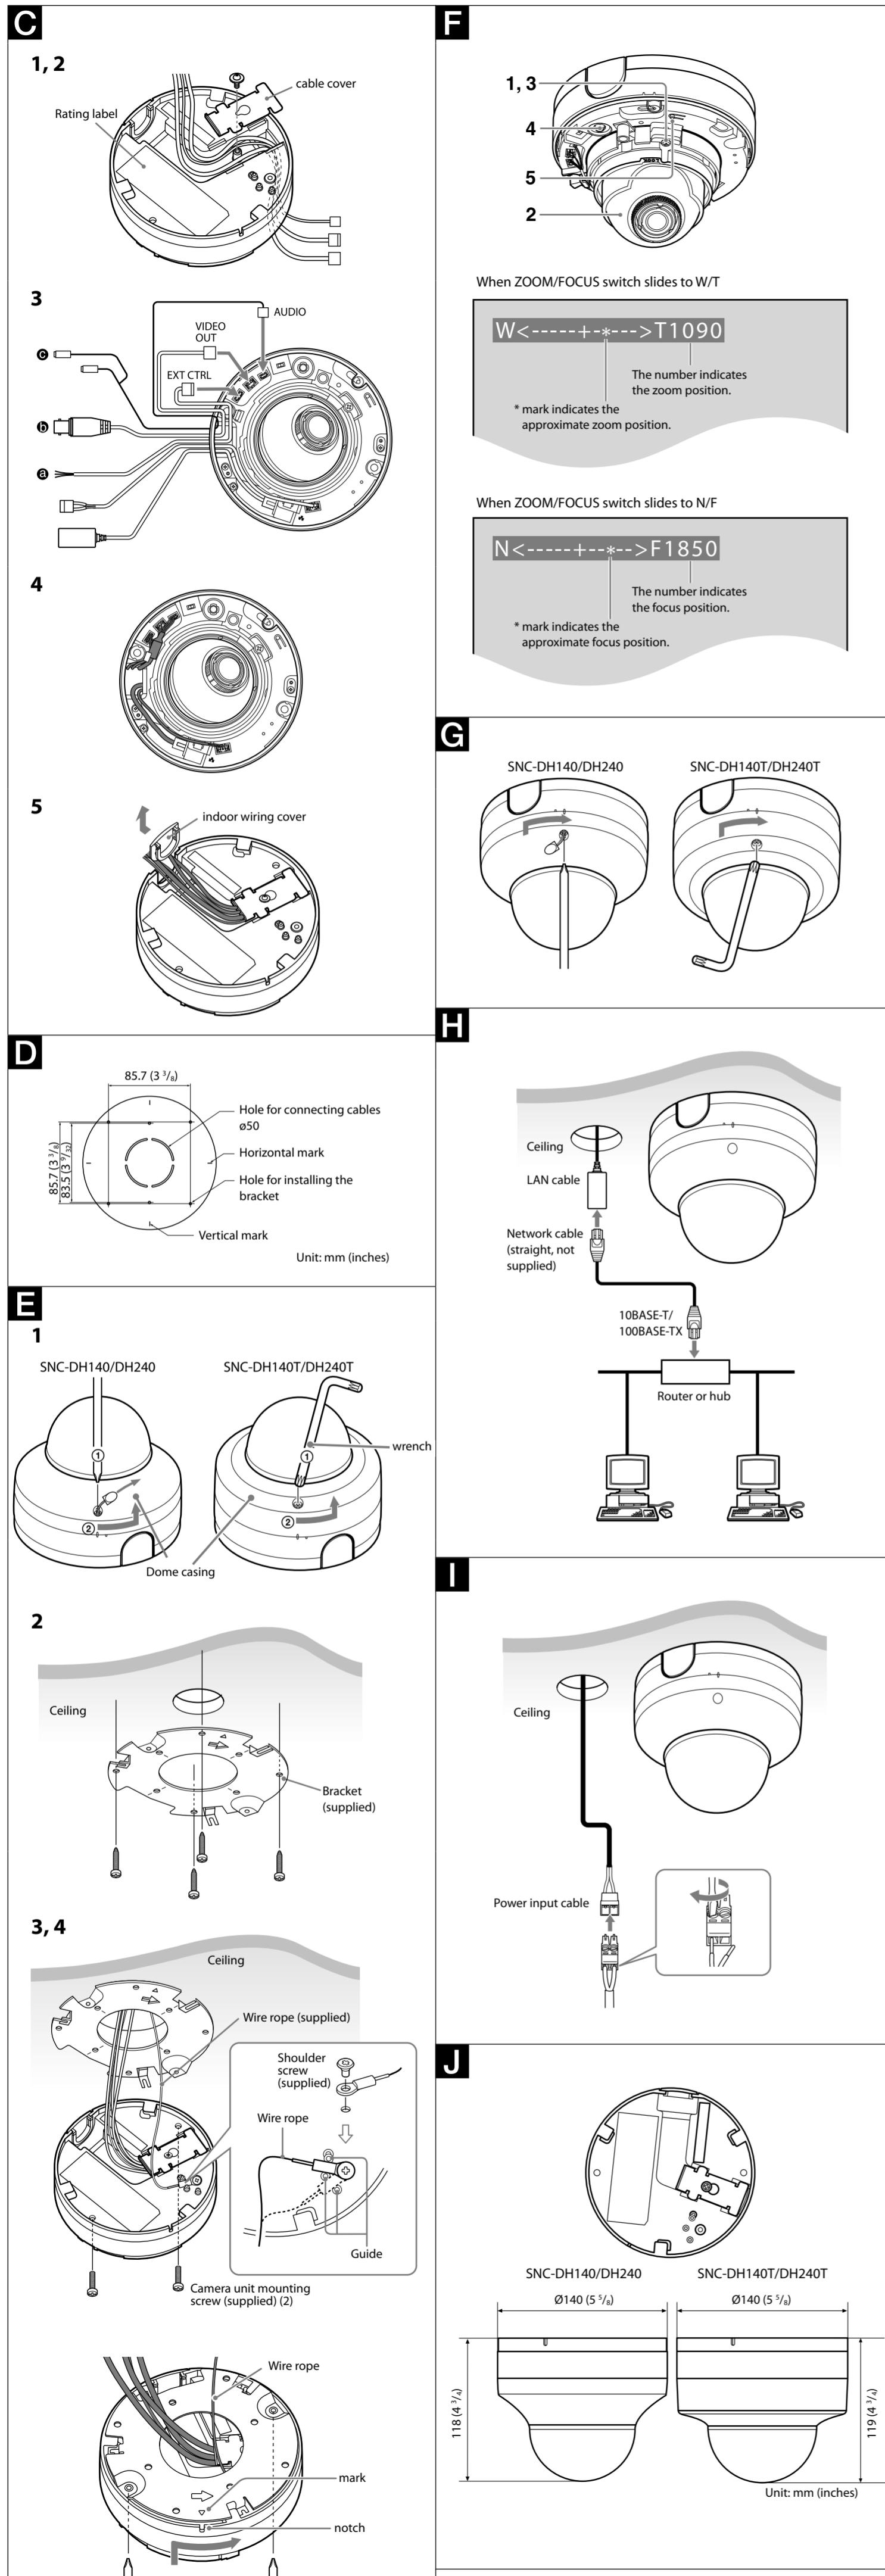

You can screw an extension cable in the connector tip attached at the end of the cable.

⑨ BNC cable (supplied)

Outputs a composite video signal.

Note

The output image is mainly used to adjust

Preparations

Connecting the Cables to the Camera

Before installation, connect the supplied cables to the camera as required for your usage and wire them.

- 1 Remove the screw on the bottom of the camera unit to detach the cable cover.
- 2 Pass the cables through the hole on the bottom of the camera unit.
- 3 Connect the cables to the connectors on the camera unit.
 - a I/O cable: to EXT CTRL connector
 - b BNC cable: to VIDEO OUT connector
 - c Audio cable: to AUDIO connector
- 4 Wire the cables along the cable guides on the camera unit. Position the cables under the cable clamps.

Note

To prevent the cables from being trapped by the dome casing, be sure to wire them using the cable guides and clamps.

- 5 Pull the cables gently from the bottom of the camera unit to take in the slack, and fix the cable cover with the screw.

To install the camera for indoor wiring, push the indoor wiring cover outwards and then remove it and pass the cables through it.

Installation

WARNING

- If you attach the camera in the height such as the wall or the ceiling, etc., entrust the installation to an experienced contractor or installer.
- If you install the camera on the ceiling, ensure that the ceiling is strong enough to withstand the weight of the camera plus the bracket and then install the camera securely. If the ceiling is not strong enough, the camera may fall and cause serious injury.
- To prevent the camera from falling, make sure to attach the supplied wire rope.
- If you attach the camera to the ceiling, check periodically, at least once a year, to ensure that the connection has not loosened. If conditions warrant, make this periodic check more frequently.

Deciding the Installation Location of the Camera

After deciding the direction in which the camera will shoot, make the required hole (ø 50 mm (2 inches)) for the connecting cables using the supplied template. Then decide the two or four mounting hole positions to install the bracket.

Mounting screws

The supplied bracket is provided with ø 4.5 mm (5/16 inch) mounting holes. Install the bracket on the ceiling or wall with screws through two or four mounting holes: two 83.5 mm (3 9/32 inches)-pitched holes or four 85.7 mm (3 1/8 inches)-pitched holes. The required mounting screws differ depending on the installation location and its material. (Mounting screws are not supplied.)

Steel wall or ceiling: Use M4 bolts and nuts.

Wooden wall or ceiling: Use M4 tapping screws. The panel thickness must be 15 mm (5/8 inch) or more.

Concrete wall: Use anchors, bolts and plugs suitable for concrete walls.

Junction box: Use screws to match the holes on the junction box.

WARNING

The required mounting screws differ depending on the installation location and its material. If you do not secure the camera with the appropriate mounting screws, the camera may fall off.

Installing the Camera

1 Remove the dome casing.

SNC-DH140/DH240

- ① Pull out the screw cover and loosen the screw with a screwdriver.
- ② Turn the dome casing to the curved mark position on the camera unit, and remove the dome casing from the camera unit. When the screw catches on the screw hole, pull up the screw.

SNC-DH140T/DH240T

- ① Loosen the screw with the wrench (supplied).
- ② Turn the dome casing to the curved mark position on the camera unit, and remove the dome casing from the camera unit. When the screw catches on the screw hole, pull up the screw.

2 Install the supplied bracket on the ceiling or wall.

Refer to "Mounting screws" for screws to be used.

3 Fix the supplied wire rope to the camera unit and the ceiling or wall.

- ① Fix the wire rope with the supplied shoulder screw to the hole for the wire rope on the bottom of the camera unit.
- Pass the wire rope between the wire rope guides.

- ② Fix the wire rope to the ceiling or wall.

4 Attach the camera unit to the bracket.

- ① Insert the supplied two camera unit mounting screws into the two mounting holes of the camera.
- The screws have a fall-prevention mechanism. The screws inserted into the screw holes of the camera unit do not fall even if you turn the camera unit upside down.
- ② Align the notch on the camera with the Δ mark on the bracket.
- ③ Turn the camera unit in the direction of the arrow.
- ④ Tighten the camera unit mounting screws.

Notes

- Use the supplied screws for installation. otherwise, you may not install the camera unit properly, even a falling may occur.
- If you cannot use screws on a ceiling or wall, or if you want to make the camera less conspicuous, use the YT-ICB45/YT-ICB140 in-ceiling bracket (optional) with which you can mount the camera on the ceiling.
- For this model, install the camera to the [B] position on the side brackets of YT-ICB45/YT-ICB140. Refer to the Installation Instructions of YT-ICB45/YT-ICB140 for detail information.

Adjusting the Camera Direction and Coverage

1 Loosen the camera head fixing screw.

2 Adjust the camera to turn the lens in the desired direction.

3 Tighten the camera head fixing screw to fix the camera.

4 Slide the ZOOM/FOCUS switch to W/T to adjust the zoom.

The zoom indicator is displayed on the monitor.

5 Press the Easy Focus button to automatically adjust the focus.

6 Repeat steps 1 to 5 until the coverage and the focus are determined.

Notes

- When you adjust the camera head angle without loosening camera head fixing screw, an internal part may be damaged.
- When the lens is not put in the slit of the camera head holder, the moving range of the camera head is limited.
- If the camera head is too heavy to be adjusted, loosen the camera head fixing screw until it moves freely.
- When adjusting the angle, be sure that the TOP mark on the camera head section faces the ceiling. If the camera is installed with the TOP mark facing the floor, the image appears upside down.
- If you cannot achieve satisfactory focus with the Easy Focus button due to the shooting environment, slide the ZOOM/FOCUS switch level to N/F to focus manually. The focus indicator is displayed on the monitor.
- Poor focus may also be caused by the dome case assembly. Readjust the focus using the system menu.

For details, refer to the User Guide of the equipment.

Note

Do not turn the lens more than 360 degrees, as this may damage the wiring inside, which may cause failure on video output.

Attaching the Dome Casing

1 Align the carved mark on the dome casing with that on the camera unit, and turn the dome casing in the direction of the arrow.

2 Secure the screw. Only the SNC-DH140/240 cover should be attached.

3 Remove the protecting film on the dome cover.

Connection

Connecting to the Network

Connect the LAN cable of the camera to a router or hub in the network using the network cable (straight, not supplied).

To connect to a computer

Connect the LAN cable of the camera to the network connector of a computer using the network cable (cross, not supplied).

Connecting the Power Source

There are three ways to supply the power source to this camera, as follows.

- 12 V DC
- 24 V AC
- Power supply equipment pursuant to IEEE802.3af (PoE system)

*PoE means Power over Ethernet.

Connecting to 12 V DC or 24 V AC source

Connect the power input cable of the camera to a 12 V DC or 24 V AC source. Use a 12 V DC or 24 V AC source isolated from 100 to 240 V AC. Each usable voltage ranges are as follows.

- 12 V DC: 10.8 V to 13.2 V
- 24 V AC: 21.6 V to 26.4 V
- In the USA, the product shall be powered by a UL Listed Class 2 Power Supply Only.
- In Canada, The product shall be powered by a CSA certified Class 2 Power Supply Only

- Use UL cable (VW-1 style 10368) for these connections.

recommended cable

DC12 V:

CABLE(AWG)	#24	#22	#20
Max. length(m)	9	15	23

AC24 V:

CABLE(AWG)	#24	#22	#20
Max. length(m)	37	63	92

Connecting to the power supply equipment pursuant to IEEE802.3af

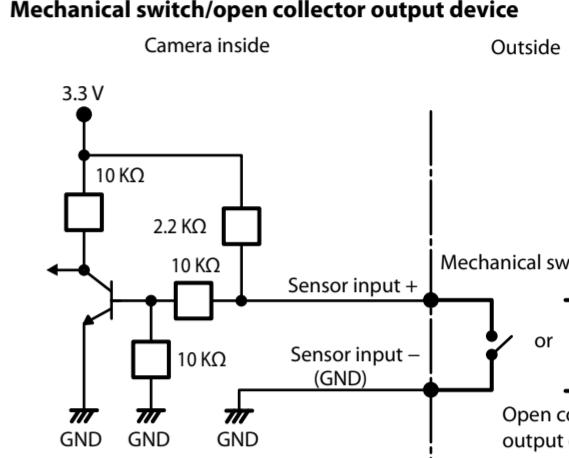

The power supply equipment pursuant to IEEE802.3af supplies the power through the LAN cable. For details, refer to the Instruction Manual of the equipment.

Connecting the I/O Cable

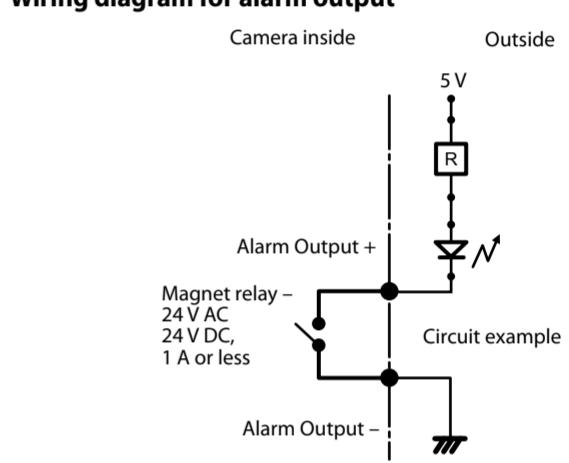

Connect the wires of the I/O cable as follows:

Wiring diagram for sensor input

Mechanical switch/open collector output device

Wiring diagram for alarm output

Specifications

Compression

Video compression format JPEG/MPEG4/H.264
Audio compression format G.711/G.726 (40, 32, 24, 16 kbps)
Maximum frame rate 264: 30 fps (1280 × 720)
SNC-DH140/DH240: 1280 × 720
H.264: 30 fps (1920 × 1080)

Camera

Signal system NTSC color system/PAL color system (switchable)
Image device SNC-DH140/DH240: 1/3-type CMOS (Exmor)
SNC-DH240/DH240T: 1/2.8-type CMOS (Exmor)

Effective picture elements: Approx. 1,390,000
SNC-DH240/DH240T: 1/2.8-type CMOS (Exmor)

Effective picture elements: Approx. 3,270,000

Internal synchronization
Horizontal resolution 600 TV lines (analog video)

More than 50 dB (AGC 0 dB)
SNC-DH140/DH140T: 0.05 lx (15IRE, F1.2)
SNC-DH240/DH240T: 0.13 lx (15IRE, F1.2)

Minimum illumination

Lens

Focal length 3.1 mm to 8.9 mm
F1.2 – F2.1

SNC-DH140/DH140T: Vertical: 67.4° to 25.0° (1280 × 1024)
Horizontal: 85.4° to 31.2°

SNC-DH240/DH240T: Vertical: 65.2° to 24.2° (1920 × 1440)
Horizontal: 88.5° to 32.3°

Minimum object distance 300 mm

Interface

LAN port I/O port
10BASE-T/100BASE-TX, auto negotiation (RJ-45)
Sensor input: x 1, make contact, break contact
Alarm output: x 2, 24 V AC/DC, 1 A (mechanical relay outputs electrically isolated from the camera)

Video output VIDEO OUT: BNC, 1.0 Vp-p, 75 ohms, unbalanced, sync negative
Microphone input* Minijack (monaural)
Plug-in power supported (rated voltage: 2.5 V DC)

Recommended load impedance: 2.2 kΩ
Minijack (monaural)

*The microphone input and the line input are switchable with operating menu.

Line output Minijack (monaural), Maximum output level: 1 Vrms

Others

Power supply 12 V DC ± 10%
24 V AC ± 10% 50 Hz/60 Hz

IEEE802.3af compliant (PoE system)
SNC-DH140/DH140T: 8.0 W max.

SNC-DH240/DH240T: 10.2 W max.

Start temperature: 0°C ~ 50°C (32°F to 122°F)

Working temperature: -10°C ~ +50°C (14°F to -22°F)

Storage temperature -20°C to +60°C (-4°F to +140°F)

Operating humidity 20% to 80%

Storage humidity 20% to 95%
